The Jayne Redman[®] Dovetail Mounting Plate

The new Jayne Redman[®] Dovetail Mounting Plate is compatible with any tool requiring a dovetail method of attachment, including GRS[®] bench tools. The plate has a 3/8" threaded hole that allows for direct attachment of compatible bench systems such as the Swanstrom SawPlate Systems and Jayne Redman[®] Bench Systems. It comes with 4 phillips head screws to attach the plate to the front of your bench, a 3/8" socket head screw and washer, and a hex wrench. The socket head screw allows any tool that is attached to rotate. Use the hex wrench to loosen, tighten, or remove the screw.

Screw a Jayne Redman[®] Mounting Bracket (A.) into the mounting plate to create a simple rotational bench pin. There are several bench pin surfaces available, the Large Aluminum Surface - 5" x 6" (B.), the Large Purple Heart Surface - 5" x 6" (C.), and the Mini Purple Heart Wood Surface - 3" x 5" (D.) .
